

Che (Percy) Liu

Beijing, China / Abu Dhabi, UAE

che.liu@mbzuai.ac.ae | linkedin.com/in/che-percy-liu

PROFESSIONAL SUMMARY

MBZUAI undergraduate in Artificial Intelligence with experience in LLM-Agent architecture, Agent evaluation and benchmarking, and AI-native product design.

Co-founder of ModCraft (public-beta AI Agent SaaS, 60+ users with zero marketing in the first month), ByteDance Research collaborator on WorkflowGym (LLM-Agent benchmark suite), and 1st-place winner of Let's in Vibe Hackathon 2026. Strong full-stack engineering skills (FastAPI, LangChain/LangGraph, MCP, PostgreSQL) paired with a product-shipping mindset. Open to research collaborations at MBZUAI during Fall 2026 and AI systems internships for Summer 2027; based in Abu Dhabi and Beijing, and open to remote opportunities or roles in Japan and the US.

EDUCATION

Mohamed Bin Zayed University of Artificial Intelligence (MBZUAI)

Abu Dhabi, UAE

BSc in Artificial Intelligence

August 2025 - May 2029

- GPA: 3.82 / 4.00

Beijing National Day School (BNDS), High School Diploma (unweighted GPA 4.00) Beijing, China | September 2022 - June 2025

WORK EXPERIENCE

Taiyouxi Game Studio (<https://www.taiyouxi.cn/>)

Beijing, China

Technical Exploration Intern — UE 5.8 AI / ML Tooling

May 2026 - Present

- Evaluate Unreal Engine 5.8's official Model Context Protocol (MCP) server and 11+ Toolsets through atomic, business-level, and end-to-end gameplay testing, producing a 38-item findings report adopted as the studio's UE 5.8 migration reference.
- Design a centralized Skill management and evolution platform on LangChain/LangGraph to upgrade the studio's "external LLM → Python → UE" workflow into a closed-loop, MCP-driven Agent automation pipeline.
- Drive the team's UE 5.8 AnimGen + AnimDatabase PoC (Mannequin animations → AutoEncoder + Controller training → AnimBP demo) as the baseline for ML-driven skeletal animation.

ModCraft (ModCraft.dev)

Remote

Co-Founder & Backend Engineer

January 2026 - Present

- Co-founded an AI-native Minecraft mod creation platform that turns natural-language prompts into fully playable Fabric mods (.jar files), removing the need for Java, 3D modeling, or pixel-art skills.
- Architected the full backend on FastAPI, PostgreSQL, Redis, and Celery, delivering session + Google OAuth, 40+ RESTful endpoints, and asynchronous task orchestration for the end-to-end mod-generation pipeline.
- Co-designed a multi-stage AI Agent (Prompt → Spec → DSL → Code → Build) on LangChain/LangGraph with human-in-the-loop checkpoints (approval, clarification, texture selection), backed by a custom DSL validation layer of 65+ JSON Schemas.
- Integrated Stripe subscription billing (\$20/month SaaS) and token-based usage quotas; reached 60+ paying users with zero marketing spend through pure word-of-mouth in the first month of public beta.

International Olympiad in Artificial Intelligence (IOAI 2025)

Beijing, China

Question Designer & Technical Support

August 2025

- Selected as the only student from BNDS to join the IOAI 2025 problem-design team based on prior FTC robotics competition experience.
- Co-authored and refined competition questions aligned with real-world AI/robotics scenarios; validated and debugged questions at GalBot's R&D lab alongside in-house engineers for two weeks.

Amazon China R&D Center — AIGC Summer Camp

Beijing, China

Team Leader (selected as 1 of 15 from top high schools nationwide)

July 2023 - August 2023

- Led a 5-person team to pioneer Stable Diffusion-based video production, extending the technology beyond text-to-image applications and securing AWS infrastructure support.
- Represented Amazon at CIFTIS (China International Fair for Trade in Services), demonstrating the AI platform and receiving on-air recognition on Beijing TV.

RESEARCH EXPERIENCE

ByteDance Research

Remote / Beijing, China

Research Collaborator — WorkflowGym Agent Benchmark

October 2025 - January 2026

- Collaborated with ByteDance Research on WorkflowGym, a benchmark and environment suite for evaluating LLM Agents on scientific and engineering workflows.
- Designed reproducible sandboxed task environments enabling Agents to autonomously explore multi-step scientific pipelines, with rigorously specified observation, action, and reward interfaces.
- Built the trajectory-logging infrastructure capturing reasoning traces, tool invocations, and intermediate artifacts to support downstream analysis of Agent capability boundaries and failure modes across model families.

Renmin University of China

Research Assistant — AI Security & Privacy in Education

Supervisor: Prof. Di Zhang

Beijing, China

May 2024 - August 2024

- Investigated legal frameworks for network security and implemented data-anonymization techniques applicable to AI-powered education platforms, identifying key risks such as data leakage and algorithmic bias.
- Authored “Research on Security and Privacy Protection Policies of AI in Primary and Secondary Education,” published in Artificial Intelligence Practice TIMES 2024 Issue 12 and indexed in CNKI.

LEADERSHIP & COMMUNITY

AP Computer Science-A Tutoring Group

Founder

Beijing, China

September 2023 - Present

- Founded an AP CSA tutoring group serving 50+ active members of first-time programmers.
- Guided students through 15 FRQ sets and led 5 capstone projects to deepen conceptual understanding; achieved a 100% 5-score rate among students attending the review sessions.

AI Solutions for Elderly Care & Memoirs Assistant

Founder & Developer

Beijing, China

August 2023 - Present

- Built an AI Elderly Care Assistant on ChatGPT addressing medication queries and providing daily companionship.
- Developed China’s first AI Memoir Assistant on Llama-3 (sponsored by AWS), authoring 28 published memoirs for senior citizens and demonstrating AI for intergenerational storytelling.

AWARDS & HONORS

2026: 1st Place (Top 1 of 60 teams), Let’s in Vibe Hackathon.

2025: 2nd Place, Blockchain Track (Top 2 of 50 teams), AdventureX.

2024: Gold Award, USA Computing Olympiad (USACO); Champion (Top 20 of 400 teams), FTC Technology Challenge China Finals; Bronze Medalist (Top 185 of 2048 teams), Kaggle PII Data Detection Competition.

2023: Certificate of Distinction, Euclid Mathematics Contest.

2022: Top Gold (Top 3%), Math Kangaroo; First Prize, National Olympiad in Informatics in Beijing (NOIP).

2021: High Distinction (Top 10%), Big Science Competition.

SKILLS & LANGUAGES

LLM / Agent Stack: LangChain, LangGraph, MCP, RAG

Backend & Data: Python (FastAPI, Celery), PostgreSQL, Redis, Docker, REST API design, Stripe Integration, OAuth 2.0.

Other Languages: C++, Java (JavaFX), JavaScript / React, SQL.

Spoken Languages: Chinese (Native), English (Bilingual, MBZUAI medium of instruction), Japanese (Conversational).
